

FULL PET RECORD

Breed Golden Retriever

Sex Male, neutered

Date of birth 14 Mar 2021 (5 yr 6 m)

Colour Golden

Weight 29.9 kg · BCS 5/9

Microchip 956000012345678

Owner Bowie · 07667 664323

Owner Buzz · 07667 664323

Biscuit

Owner note Friendly and food-motivated. Sensitive stomach and seasonal itchy skin. A little anxious in thunderstorms.

CHIEF COMPLAINT · VISIT 17 OCT 2026

Yearly check-up, weight review and DHPPi + Lepto4 booster. Bring his vaccination card.

Booked as: Annual health check & booster vaccination

REVIEW

Vaccinations: Nobivac L4 (13 d overdue) · Nobivac DHP (due in 7 d)

Out of range (31 Aug 2026): ALKP, Lymphocytes

Active symptoms: Itchy skin and scratching ears (mild, since 11 Oct 2026)

Unremarkable: eating, drinking, urination, defecation, weight

CONDITIONS

Atopic dermatitis: Diagnosed Feb 2026. Seasonal flares, worst in late spring/summer.

Osteoarthritis (early, both hips): Mild stiffness after rest, worse on cold days.

Sensitive stomach: Occasional soft stools after diet changes or scavenging. Settles on a bland diet.

History: Vomiting, resolved Aug 2026 · Neutering (castration) (Aug 2021)

MEDICATION

Apoquel · 16 mg · twice daily · last given 12 Oct 2026 · 93% given, 28/30 days

Librela · Monthly injection · once monthly · last given 01 Oct 2026 · not scored

MOBILITY (ARTHRITIS)

Recorded 09 Oct 2026

Overall Good

Score 1.08 of 4 (mean of 12) · was 1.42
Lower (better) by 0.34 since 13 Sep 2026

- Slow to get up or lie down · 2
- Difficulty with steps or stairs · 2
- Stiff in the morning · 2
- Walking slowly · 1
- Limping around the house · 1
- Difficulty jumping up or down · 1
- Stiff after activity · 1
- Less keen to walk or play · 1
- Sounds showing distress · 1
- Appeared restless · 1
- Other 2 items · 0 between them

Owner-reported CaOA-QoL-TS (Gildea et al. 2024, CC BY 4.0): mean of 12 items, 0 to 4, higher is worse.

BODY COVER

Recorded 23 Sep 2026

Overall Check

- Reduced gluteal cover
- Temporal muscle cover normal
- Scapular cover normal
- Epaxial muscle cover normal

WSAVA Muscle Condition Score sites, palpated by the owner; not a veterinary examination.

ORAL HEALTH

Recorded 11 Oct 2026

Overall Check

- Halitosis on close examination
- Mild marginal calculus
- Soft plaque, brushes away
- MM pink

Conscious examination by the owner, no probing or radiographs.

LABORATORY RESULTS · 31 AUG 2026

15 analytes, 15 shown

Vet's note · Dr. Sarah Whitfield, Maple Grove Veterinary Clinic: Three-month bloods on oclacitinib (Apoquel) for atopic dermatitis, ahead of the annual check; Angiostrongylus antigen added as he swims in and drinks from ponds. ALKP mildly raised and lymphocytes just below range against the pre-treatment baseline, consistent with oclacitinib; no clinical signs, treatment unchanged. Recheck in three months, sooner if lethargic, off food or any infection.

ANALYTE	RESULT	PREVIOUS · 21 MAY 2026	CHANGE	REFERENCE
ALKP	258 U/L	196	+32%	23-212
